Professional Summary

Proactive AI Engineering student with a strong foundation in modern software development principles. Eager to secure a challenging entry-level Software Engineer position at a leading company, where my skills can be applied to build secure and user-friendly applications.

Education

Alamein International University, BS in Computer Engineering Sept 2022 – Jan 2027
(expected)

- **Coursework:** Computer Architecture, Software Engineering, Cloud Computing

Experience

Cross Platform Mobile App Developer Intern, DEPI – Egypt, Hybrid Jul 2025 – Dec 2025

- Engineered application state management using Flutter Bloc, reducing debugging time by 30% and improving code maintainability.
- Implemented Firebase Authentication user registration/login flow, enabling secure access for 500+ users during testing.
- Collaborated in Agile sprints, contributing to a 95% on-time milestone delivery rate

Oracle Manufacturing Consultant Intern, USE – Egypt, On-site Jul 2025 – Sep 2025

- Analyzed client needs to design, configure, and implement Oracle ERP solutions.
- Translated business needs into detailed functional specifications for Oracle manufacturing modules.
- Configured and customized Oracle modules such as WIP, BOM, Inventory, Cost Management, and Quality Management.
- Applied these solutions to either Oracle Fusion Cloud ERP or Oracle E-Business Suite.

Projects

Home Lab Infrastructure & Server Management

- Deployed and managed virtual machines and Linux containers (LXC) using Proxmox VE to simulate production environments.
- Configured and administered Ubuntu Server instances, managing complex network configurations including IP allocation, Reverse DNS setup, and secure VPN deployments alongside SSH access and system security.
- Hosted personal projects and dockerized applications to streamline testing and deployment processes.
- Tools Used: Proxmox, Ubuntu Server, Bash, Docker

Customer Churn Prediction

- Trained a churn prediction model with 80% accuracy.
- Tools Used: Python, ML, Qt Designer

Round Robin Racing Game

GitHub Repo

- Applied a multi-threaded racing simulation, demonstrating concurrency and scheduling.
- Managed 8 concurrent threads in a racing simulation, improving processing speed by 300% compared to a single-threaded approach
- Tools Used: Java, Multithreading

University Library Management System

GitHub Repo

- Designed and executed a Library Management System to manage books, students, and borrowing/returning operations.
- Integrated with a MySQL database for storing and managing records, applying security measures to protect

sensitive data, and ensuring safe queries.

- Tools Used: Java, MySQL, Swing (JFrame), OOP

Technical Skills

Programming Languages: Java, Python, C++ , Dart, SQL

Concepts : OOP, Multithreading, Agile Methodologies

Databases: MySQL, Firebase

Frameworks & Libraries: Flutter, FastAPI, Pandas, NumPy, Scikit-learn

DevOps & Tools: Git, GitHub, Docker, Proxmox, VPNs

Operating Systems & Virtualization: Linux (Ubuntu Server), Windows, Proxmox VE

Languages

Arabic: Native

English: Professional Working Proficiency
